

Dear Principals, STEM Coordinators, and Potential Coaches,

Maine Robotics, in partnership with the Robot Track Meet Association, is offering new schools the opportunity to send two (2) student team members to one of Maine's three Robot Track Meets being held this year in May, [free of charge](#).

We are hoping that as you check out the program you might want to send additional students, but that is not required.

I'm including our flyer, our coupon for the offer, and below are the links to the RTMA website. Note, if you go to the downloads section, you can get a free PDF of this year's rules and regulations. <https://www.robottrackmeets.org/>

This is our 16th year offering this program here in Maine and we've had thousands of students participate and have a great time while learning about engineering, problem solving and computer programming.

All you need to get started is a robot, the rules, and a coach. Any LEGO Mindstorm Robot Kit or the VEXIQ Robot Kit are eligible for this program.

We also invite you to pass this around your school and school district. Anyone can field a team, although this offer is exclusive to public and private schools with students in grades 3 through 8.

If you have any questions, please just call or email us and we'll help any way we can.

Sincerely,

Thomas Bickford, Director
